## PATIENT CARE & COMMUNICATION CONSENT HIV TESTING

I, _____ acknowledge that I have received information and advice prior to taking the Human Immunodeficiency Virus (HIV) test, the virus that causes Acquired Immunodeficiency Syndrome (AIDS). I have been informed about everything concerning this blood test, benefits and risks. I understand that HIV blood tests are not 100% accurate, they can be False Positives or False Negatives. I am also aware that a positive HIV test means that a person has probably been infected with the virus, but it does not mean that the person will develop AIDS. I have understood that even if a person does not develop AIDS, or get sick with the virus, they can transmit the virus to other people; therefore it is important to know if the Virus is present or not, to avoid contagion and thus protect other people.

I understand that the results will become part of my record and will be made available to the Medical and Administrative Staff of the Hospital, Georgia Prenatal, and Health Insurance Companies. However, the contents of my file will not be disclosed to third parties without written consent, unless authorized or required by law.

I also understand that I will be notified of the results and receive instructions after the exam. Based on this I authorize the HIV test to be performed.
